

## Athlete Testimonials for Oxifend® Sport

### ➤ **Jeremy McKenzie: Multisport and Running**

I have been racing and competing in various running, multisport and adventure racing events for over 20 years with some of the recent highlights being winning the 2007 Marlborough Adventure sport race, winning my run stage and team event in the rugged Molesworth relay, placing 3rd at the 2010 Queen Charlotte Classic and 4th at the 2010 "Big Day out race" in Methven. The latter two events involved racing some of New Zealand's top multi-sporters.

Leading a busy life as a father of two and Senior Winemaker for Villa Maria, in late 2010, I was hampered by a niggling injury which limited me in the training I was able to do. However, by using Oxifend® Sport pre- and post-exercise I have noticed a huge increase in my body's ability to recover and hence I have been able to train at a level required to hopefully achieve my goal of placing in the top 20 of the 1-day Speights Coast to Coast world multisport race. This event will require my body to be performing at its absolute optimum for over 12 hours and with the support of New Zealand extracts I am determined to achieve my goal. I would highly recommend the use of Oxifend® Sport for any athlete.

**Jeremy McKenzie**

### ➤ **Ray Dunstan: Competitive Amateur Road Cyclist**

In 2009 while training for the World Cycling Champs I tried New Zealand Extract's Oxifend® Sport capsules as they had been shown to aid muscle recovery. I tried it for a while and was getting good results with my training but did not really attribute it to the Oxifend® Sport. I stopped taking the capsules once I returned from the World Champs.

This year I started training again for the 2010 World Champs on the same program with a similar loading to what I had used the year before. I found my body was just not handling the training as well as it had the year before. When I looked back the only difference I could see between the training programs was the use of the Oxifend® Sport capsules.

I started using Oxifend® Sport again and noticed a significant difference in my training recovery. I am now doing more weights in the gym and power sessions on the bike than ever before and my body is easily coping with the increase. I would highly recommend the use of the Oxifend® Sport for any athlete.

➤ ***Pete Halligan: Event Organiser/Director for Top of the South Events, New Zealand***

I have been taking Oxifend<sup>®</sup> Sport now for the last month as prescribed on the container: by taking one capsule an hour before and a second capsule an hour after training and have seen some outstanding results in my performance on my road and time trial bikes. People have been asking me, "What drugs are you on Pete?" and I am happy to tell them it is Oxifend<sup>®</sup> Sport.

No more muscle stiffness after workouts at the gym or tired legs after a good solid bike ride. I have changed nothing in my training or food intake during this last two months to what I would normally be doing during this time of the year. Best of all it has helped me win a race recently at the inaugural Australian Graperide where I finished 5th overall and first in the 45 to 54 age group category over the 104km course.
